

IMPY PILAPIL

BLOOM

2010

I have known Impy for 35 years and through these years, I have witnessed her evolve, blossom and bloom. Reminiscing, I still remember her tailor shop and how I revered each *barong tagalog* that I bought for my husband as they were works of art. Her devotion to her art and personal commitment are manifested in the exhibits and innovation she has put in each and every one of her pieces. More and more, she works on signature pieces while managing to bring forth organic works inspired by nature and the cosmic forces.

Impy has discovered the philosophy of the world that exists within and around us and she has embraced this wholeheartedly. The sense of the universe has bolstered her creative energy giving birth to works that are powerful, feminine, sensual and peaceful. She is my version of a true Bodhisattva – an artist of great compassion and wisdom – who allows the spectator to experience this beauty through her interactive & synergistic works.

It is a great honor to be her gallerist and friend. She has opened my world to many beautiful radiant discoveries - and for this, I am eternally grateful.

Che la tua arte sopravviva nei secoli ed ispiri l'amore e il rispetto per questa bellissima terra!

May your art live through the centuries as it inspires love and respect for our beautiful earth!

Silvana Ancellotti-Diaz

The marvelous rhythm of being and appearance -- blossoming and germinating, expanding and contracting -- is the primal phenomenon of metamorphosis.

The breathing in and breathing out that spell an eternally animated transformation of all things around us is a reality in nature that most of us take for granted.

The wonder of every substance on earth, specifically the plant kingdom, becoming a materialized expression of a cosmic process is the inspiration of my new works.

“Within nature spread around us are enchanted secrets
that can be discovered by feeling their outer mysteries”

Rudolf Steiner

I hope you will experience your separate solitudes while connecting with each piece.

In a world fed with 'thought ideas' everyday, I was very careful about my own process of thinking and its relationship to the human being's 12 Senses.

Silence and space are always vital for me to prepare and develop the inner sanctuary that would be home to authentic ideas -- which eventually give birth to my new artworks. This enables me to achieve what I believe is my duty as an artist: to exhibit works that are fresh and from the heart.

I have written a few words about the pieces on exhibit and I hope that viewers, using their own feeling and imagination, will also come upon the experience of wonder, compassion and conscience from which they were created.
